XEVU

IDENTITY + LAUNCH GUIDE / 01

Carry what matters.

XEVU is pronounced zeh-voo. A short, abstract identity for an offline file workspace across creative, professional, research and personal uses.

POSITION

A portable, offline file workspace. Encrypted copies stay in the vault; explicit exports restore original files.

THE MARK

Four paths meet around an open center. The split X suggests controlled exchange without a shield, padlock or industry emblem.

THE VOICE

Direct, capable and calm. Show what works. Name the preview limits. Avoid fear, secrecy theater and absolute security claims.

LOGO USE

Keep the mark open and monochrome. Use lime on graphite, ivory on dark surfaces, or graphite on light surfaces. Minimum clear space: one quarter of the mark height. Minimum digital mark size: 24 px.

ART DIRECTION

Abstract manufactured forms, tactile graphite and titanium, one restrained lime edge. Neutral to industry. No military insignia, weapons, rockets, antigravity devices or compliance seals.

LAUNCH + CLAIMS

CLEAR COPY. EVIDENCE FIRST.

SHORT DESCRIPTION

XEVU is an open-source, offline file workspace for carrying encrypted documents and media, with explicit drive access and original-file export.

LAUNCH POST

Meet XEVU. Carry what matters: project files, documents, media and personal archives. Try the native USB/SD preview or VM, explore the code, and help shape what comes next.

SUPPORTED CLAIMS

Encrypted vault contents and names. Explicit drive selection. Verified original-file export. No network stack or telemetry in the native image. Public source and verification evidence.

PREVIEW LIMITS

This is firmware-backed UEFI software, not a completed standalone OS. It is unsigned and unaudited. No government or regulatory approval is claimed. Native viewers and filesystems are limited. Use test data. Three failed native unlocks erase the boot medium.

NAME STATUS

Public web screening found no obvious same-name operating-system product, but XEVU appears in unrelated names. No trademark or domain clearance is claimed. See marketing/NAME_RESEARCH.md.
